

# Hydraulic Hose & Inserts

Hydraulic hoses are typically constructed from flexible rubber or wire and have multiple layers for strength and durability. These layers include an inner tube, a reinforced layer, and an outer layer.

A hydraulic hose enables fluid to flow from one section to another, ensuring unrestricted movement through a structure. There are two types of hydraulic hoses: SAE standards (from the Society of Automotive Engineers) and EN standards (European).

Hydraulic hoses are utilised in various industries, including automotive and rail, pharmaceuticals, construction, manufacturing, and agriculture.

## Hydraulic hose

- One and two wire braid
- Two wire compact
- Four wire spiral
- Paint spray
- High pressure
- Compressor installation and breaker hose assemblies

## Also available

- Adaptors
- Compression and lubrication fittings
- Hydraulic hose protection, tube and accessories
- Pressure washer
- Twin ferrule
- Rotary unions
