

CDC 10 Bar Speed Controllers

Features

- Accurate regulation of an optimal airflow rate for precise motion control
- Tube direction and angle are controlled according to piping, as the main body can rotate up to 360° after assembly
- Needle rotation is increased to 10 – 12 times for easy speed and regular speed control
- Easy speed control with drive tools in limited and crowded spaces NSC (D) and NSC (DC) types
- Miniaturised products occupy small space attaching to devices

Applications

- A valve to control the speed of the air pressure cylinders
- Mainly installed in the air cylinder
