

Nylon Tube

Nylon tubing is a versatile material for pneumatic / hydraulic systems, such as air brakes and fuel and lube systems. It is also suitable for use in low-toxic or high-temperature environments, such as breweries or applications that require food contact.

Nylon tubing is lightweight, flexible, and easy to install. It resists various chemicals and has a smooth inner surface that improves flow. Additionally, it has low moisture absorption and excellent abrasion resistance, making it an appropriate choice for many applications, including the ones below:

- Compressed air
- Water
- Chemicals
- Fuel / oil
