

## HAND INSTALLATION PINCERS

### DESCRIPTION

Oetiker Hand Installation Pincers (HIP) have been designed especially for industry & trade applications, as well as automotive service & repair, for pinching Oetiker ear clamps quickly & easily.

Side jaw pincers allow for the installation of clamps in limited spaces where a standard jaw configuration is not feasible.

For the installation of genuine oetiker ear clamps.

### COMPOUND ACTION PINCER STRAIGHT HANDLES

### COMPOUND ACTION PINCER

#### SIDE JAWS – CURVED HANDLES

4140

PART NUMBER	JAW WIDTH	OPENING GAP
OET14100499	12.4 mm	Top: 20.3 mm Side: 15.4 mm

Recommended for 101, 108, 151, 153, 154, 163, 167 clamps

## HAND CLAMP CUTTERS

### DESCRIPTION

Oetiker hand clamp cutters are designed to safely remove Oetiker ear clamps that can be closed with Oetiker HIP 2000 series hand installation pincers or similar power tools. FOR CLAMP REMOVAL ONLY. Orange grips distinguish hand clamp cutters from hand installation pincers. Heavy duty hand clamp cutters offer maximum mechanical advantage for easier and safer use, longer handles for higher force generation.

For the removal of genuine Oetiker ear clamps.
