

FEATURES

The new & improved air connector has been designed to enhance & bring the PCL connector range into the 21st century. Through extensive in-house & external testing, the new air connector has been proven to be as robust & reliable as ever.

Alloy / steel wheels have got bigger, with intricate designs making the valves more difficult to reach with the human hand.

The new range now consists of standard straight, as well as 90 degree connectors, for those difficult to reach valves, with both hose tail fitting & female threaded versions available.

Manufactured using the finest zinc alloy, aluminium & brass, the air connector boasts a vice-like grip & easy operation, with a simple but effective thumb push button, which quickly releases the tyre valve, reducing non-value added time.
