

FLUID & LUBRICATION PRODUCTS

DISTRIBUTED BY:

SAMOA Ltd (UK) was established in 1987 as a distribution and marketing company for the United Kingdom and Republic of Ireland.

SAMOA SA were initially a manufacturer of grease nipples and lever grease guns. Now SAMOA has evolved to become one of the worlds leading manufacturers of lubrication equipment.

While keeping in its manufacturing program the products with which SAMOA started its activities, new products are always being developed and added to the SAMOA range. This enables SAMOA to now be one of the largest manufacturers with the widest product program developed and manufactured in its own factories.

SAMOA products are present in more than 75 countries through a selected network of distributors.

SAMOA Ltd (UK) offers training at our UK site or on location covering a vast range of products from lubrication equipment training to installation and operation of the NEX.U. fluid monitoring equipment, plus much more.

All products are manufactured and assembled at one of SAMOA's SA factories. The latest design, equipment and technology enables SAMOA to keep up to date with market demands.

PUMPMASTER 35/45/60 PUMP SYSTEMS WITH PNEUMATIC HOIST & GRAVITY INDUCTOR

PM35/PM45/PM60 grease pumps mounted onto a gravity fed follower plate and an air operated pump hoist for use with 50kg and 185kg drums.

The air operated pump hoist lifts and lowers the pump, making drum changes easier, faster and safer. The pump lower end is rigidly fixed to a follower plate with a single rubber lip. The weight of the pump, pump bracket and follower plate plus the atmospheric pressure pushes the assembly against the fluid eliminating channelling and air pockets, keeping the lubricant free from contaminants, minimising waste and aiding pump priming.
