On-off/soft-start valves MS-EM/EE/DL/DE, MS series

 \star

Festo Core Range Solves the majority of your automation tasks

Worldwide: Simply good: Fast: Quickest delivery – wherever, whenever Expected high Festo quality Easy and fast to select With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.

The Core Range offers you the best value for your automation tasks.

Key features

Service unit components of the MS series

Solutions for every application

With its large product range, highly effective components and a wide choice of functions, the MS series from Festo offers a complete concept for compressed air preparation. It is suitable for simple standard applications as well as application-specific solutions with very high quality requirements. Available as individual components, pre-assembled combinations ex-stock, application-specific combinations or complete turnkey solutions. The five sizes in the MS series achieve maximum flow rates with low space requirements.

Freely combinable function modules

Pressure regulators, on/off and softstart valves with safety function, filters, pressure and flow sensors, dryers, sensors and lubricators can be assembled into a suitable solution for every task. With the modular structure the components can be combined as required. The simple connection system saves time because the entire combination doesn't need to be disassembled when replacing individual modules.

Many of the components are also UL and ATEX certified.

CAD models and configurator

Convenient tools for planning and se-

lecting application-specific individual

devices and combinations. The product

configurator lets you configure custom-

ised solutions quickly and transfer the

order data without any hassle.

Engineering tools

Integrated sensors

Pressure and flow sensors

- Maximum machine availability thanks to controlled processes
- Reliable compressed air preparation and supply for systems
- Integrated or stand-alone
- Easy to connect with M8/M12 plug

Safety functions Soft-start/quick exhaust valves MS6-SV/MS9-SV

- Fast and reliable exhausting of systems up to Performance Level e, certified to EN ISO 13849-1
- Integrated soft-start function

Saving energy

- Fully automatic monitoring and regulation of the compressed air supply
- Automatic shut-off of the compressed air in stand-by mode
- Detection and notification of leakages
- Condition monitoring of relevant process data

Intelligent mix of sizes

- Optimum flow rate with a size that is up to 18% smaller
- Excellent energy efficiency
- Cost-optimised combinations save up to 30%!

Key features

Note

Information

The next few pages provide a brief overview of the product range for the MS series service unit components.

Design of a service unit combination

The sequence of the individual components within a service unit combination is relevant for safety and functionality. The service unit components cannot be combined in any order in the flow direction. There are restrictions and rules. You can find detailed information and all the technical data in the documentation for the relevant service unit component.

The configurator for the service unit

of arranging individual service unit

MSB is a reliable and convenient way

components and ensures compliance

with the applicable rules. As a result,

you get a fully assembled unit, includ-

ing UL or ATEX certification, if neces-

When combining a unit from individu-

ally configured and ordered service

unit components, the points on the

right must be adhered to under all cir-

sary.

cumstances.

Accessories such as connecting plates or mounting brackets can be ordered either via the configurator or separately.

- Regulators MS-LFR/LR/LRP are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed in the flow direction upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Datasheet

Function

• A silencer can be connected to port 3 or the exhaust air can be ducted

here

• When the valve is closed, the rotary knob can be secured with a padlock

- Optional pressure gauge
- Optional pressure sensor
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

Gonoral	technical	ctch

• Manually actuated on/off valve for

pressurising and exhausting pneu-

• The valve is switched by turning the

6 neral technical data

matic systems

rotary knob

Size	MS4	MS6
Pneumatic connection 1, 2		
Female thread	G1/8 or G1/4	G1/4, G3/8 or G1/2
Connecting plate [AG]	G1/8, G1/4 or G3/8	G1/4, G3/8, G1/2 or G3/4
[AQ]	1/8 NPT, 1/4 NPT or 3/8 NPT	1/4 NPT, 3/8 NPT, 1/2 NPT or 3/4 NPT
Pneumatic connection 3	G1/4	G1/2
Design	Rotary switching valve	
Type of mounting	With accessories	
	In-line installation	
Mounting position	Any ¹⁾	
Pressure indication	Via pressure sensor for indicating the output pre	ssure and electrical output via LCD display
	Via pressure sensor for indicating the status of the	ne output pressure and the electrical output
	Via pressure gauge for displaying the output pres	ssure
	Via pressure gauge with red/green scale for indic	ating the output pressure
	Prepared for G1/8	-
	Prepared for G1/4	
Valve function	3/2-way valve, bistable	
Exhaust function	Cannot be throttled	
Switching position indication	Knob actuator direction = flow direction	
Type of actuation	Direct	
Flow direction	Not reversible	

1) The on/off valve must be mounted vertically when combined with a pressure sensor as condensate must not collect in the pressure sensor.

Note: This product conforms to ISO 1179-1 and ISO 228-1. ŧ

Characteristic flow rate values

Characteristic flow rate values					
Size	MS4		MS6		
Pneumatic connection 1, 2	G1/8	G1/4	G1/4	G3/8	G1/2
Standard nominal flow rate qnN ¹⁾ [l/mi	in]				
In main flow direction $1 \rightarrow 2$	1200	2200	3000	5500	8700
In relief direction 2 \rightarrow 3	1900	1700	6800	6600	6200
C value [l/s*min]					
In main flow direction 1 \rightarrow 2	4.6	9.0	10.7	21.2	30.8
b value					
In main flow direction 1 \rightarrow 2	0.51	0.39	0.56	0.49	0.57

1) Measured at p1 = 6 bar and p2 = 5 bar, $\Delta p = 1$ bar.

Datasheet

Flow rate 1000 ... 7000 l/min

- Choice of three voltage rangesDucted exhaust is possible via a
- threaded connection with silencer

• Manual override: non-detenting and detenting (variant 10V24/10V24F non-detenting only)

• Solenoid actuator can be reposi-

tioned by 180°

- Optional pressure sensor
- Optional device variant EX2 for use in potentially explosive areas in zones 2 and 22

Datasheet

Function

The duration of the pressure build-up is set using the restrictor attached to the valve cap.

The output pressure p2 rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

General technical data

Flow rate
 1000 ... 6450 l/min

- Operating pressure
 4 ... 18 bar
- Pneumatically actuated soft-start valve for slowly pressurising and exhausting pneumatic systems (for use with on/off valves EM1 and EE)

- The drives move slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- Main seat opening at approx. 50% of operating pressure
- Adjustable switching time delay
- Optional pressure sensor
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

Switching point – Pressure p as a function of time t MS4

- [1] Tolerance range
- [2] Switching point
- [3] Filling time is adjustable via a restrictor

- 🌡 - Note

The +20%/-10% switching point tolerance refers to the operating pressure p1. Example: A switching point from 1.6 bar to 2.8 bar is permissible at an operating pressure of 4 bar.

📲 - Note

The +20%/-20% switching point tolerance refers to the operating pressure p1. Example: A switching point from 1.2 bar to 2.8 bar is permissible at an operating pressure of 4 bar.

Note: This product conforms to ISO 1179-1 and ISO 228-1.

Datasheet

Function

The duration of the pressure build-up is set using the restrictor attached to the valve cap.

The output pressure p2 rises slowly in accordance with the restrictor setting. While the solenoid valve is not actuated, only the flow rate of the flow control valve is available. The main seat is only opened when the solenoid valve is energised.

- Flow rate
 1000 ... 6450 l/min
- Temperature range
 -10 ... +60 °C
- Operating pressure
 4 ... 18 bar
- www.festo.com

When the solenoid valve is switched off, the main seat is closed and only the flow rate of the flow control valve is available.

When exhausting a system, the solenoid valve should remain switched on; this increases the volume flow from 2 to 1 and shortens the exhaust time. For this, a quick exhaust valve must be connected upstream.

- Electrically actuated soft-start valve for slowly pressurising and exhausting pneumatic installations
- The drives move slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- With solenoid coil, without plug socket
- Choice of three voltage ranges
- The switching pressure can be precisely controlled with a solenoid valve
- Adjustable switching time delay
- Manual override: non-detenting and detenting (variant 10V24 non-detenting only)
- Solenoid actuator can be repositioned by 180°
- Optional pressure sensor
- Optional device variant EX2 for use in potentially explosive areas in zones 2 and 22

1) Module connector [2] is included in the scope of delivery.

2) The screws for the wall bracket on the rear are partially covered by the housing of this service unit component. Depending on the configuration of the service unit combination, the screws will no longer be accessible. The mounting bracket MS9-WPM is therefore recommended for wall mounting. It can be used to attach a fully assembled combination to the pre-mounted wall bracket.

2/2-way valve, bistable

3/2-way valve, bistable

- Manually actuated on/off valve for pressurising and exhausting pneumatic systems
- Ducted exhaust is possible via a threaded connection with silencer

General technical data

Flow rate
 8000 ... 18000 l/min

Temperature range
 -10 ... +60 °C

Operating pressure
 0 ... 20 bar

www.festo.com

- The switching position is immediately recognisable
- Actuation is prevented by locking the rotary knob

- Commercially available padlock can be used for security
- Optional pressure gauge
- Optional pressure sensor
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

Design		Piston spool valve
Type of mounting		With accessories
		In-line installation
Mounting position		Any ¹⁾
Actuator lock		Rotary knob with latch
Pressure indication		Via pressure sensor for indicating the status of the output pressure and the electrical output
		Via pressure gauge for displaying the output pressure
		Via pressure gauge with red/green scale for indicating the output pressure
		Prepared for G1/4
Valve function		2/2-way valve, bistable
		3/2-way valve, bistable
Exhaust function		Cannot be throttled
Reset method		Force-pilot actuated
Type of actuation		Direct
Sealing principle		Soft

1) The on/off valve must be mounted vertically when combined with a pressure sensor as condensate must not collect in the pressure sensor.

Note: This product conforms to ISO 1179-1 and ISO 228-1.

1) Module connector [2] is included in the scope of delivery.

2) The screws for the wall bracket on the rear are partially covered by the housing of this service unit component. Depending on the configuration of the service unit combination, the screws will no longer be accessible. The mounting bracket MS9-WPM is therefore recommended for wall mounting. It can be used to attach a fully assembled combination to the pre-mounted wall bracket.

On/off valves MS12-EM, MS series

Datasheet

Function:

- N Flow rate 25000 ... 32000 l/min
 - Temperature range
 -10 ... +60 °C
 - Operating pressure
 0 ... 20 bar

- Manually actuated on/off valve for pressurising and exhausting pneumatic systems
- Ducted exhaust is possible via a threaded connection with silencer
- The switching position is immediately recognisable
- Actuation is prevented by locking the rotary knob
- Commercially available padlock can be used for security

On/off valves MS12-EE, MS series

Datasheet

- N Flow rate 25000 ... 32000 l/min
 - Temperature range
 -10 ... +50 °C
 - Operating pressure
 3 ... 16 bar

- Electrically actuated on/off valve for pressurising and exhausting pneumatic systems
- With solenoid coil, without plug socket
- Choice of three voltage ranges
- Ducted exhaust is possible via a threaded connection with silencer
- Detenting and non-detenting manual override

General technical data

Pneumatic connection 1, 2	-	
Connecting plate [AG]		G1, G1 1/4, G1 1/2 or G2

Datasheet

Function:

- Temperature range –10 ... +60 °C
- Operating pressure 2 ... 20 bar

www.festo.com

The duration of the pressure build-up is set using the restrictor attached to the valve cap.

The output pressure p2 rises slowly in accordance with the restrictor setting. The main seat opens when the switchthrough pressure is reached.

- Pneumatically actuated soft-start valve for slowly pressurising and exhausting pneumatic systems (for use with on/off valves EM and EE)
- The drives move slowly and reliably into the initial position
- Sudden and erratic movements are avoided
 - Main seat opening at approx. 50% of operating pressure
 - Adjustable switching time delay

Duty cycle [%]		100					

- Flow rate
 25000 ... 42000 l/min
- Temperature range
 -10 ... +50 °C
- Operating pressure
 3 ... 16 bar

When the solenoid valve is switched off, the main seat is closed and only the flow rate of the flow control valve is available.

When exhausting a system, the solenoid valve should remain switched on; this increases the volume flow from 2

to 1 and shortens the exhaust time.

- Electrically actuated soft-start valve for slowly pressurising and exhausting pneumatic systems
- The drives move slowly and reliably into the initial position
- Sudden and erratic movements are avoided
- With solenoid coil, without plug socket
- The switching pressure can be precisely controlled with a solenoid valve
- Adjustable switching time delay
- Choice of three voltage ranges
- Detenting and non-detenting manual override

Standard nominal flow rate qnN¹⁾ [l/min]

In main flow direction 1 \rightarrow 2	25000 42000
