Push-to-Connect Fittings

Resin Body

Stainless Steel

All Brass

ATP has tested products from around the globe to find the highest quality, best valued push-to-connect fitting line to offer our customers for use with our USA manufactured Surethane® polyurethane, Nylochem® nylon 12, and Value-Tube™ LLDPE tubing. This catalog presents the new partnership between ATP and CDC Pneumatics for primarily resin pneumatic push-to-connect fittings. ATP will continue to offer an all metal fitting and has added a stainless steel option for the most demanding applications. Take a look below at why you might want to use Stainless Steel Fittings in your application. In order to provide our customers both outstanding delivery and service, ATP is committed to maintaining a large inventory including the majority of all models and sizes available on our shelves. Please also check out our manufactured Tubing and Spiral Recoil products available in our online catalogs at www.atp4pneumatics.com.

Our Stainless Steel line is suitable for all those applications where brass, nickel-plated and acetal fittings are banned. The AISI 316L fitting is designed to withstand corrosive environments (substances), to channel aggressive fluids and to be used in the food, pharmaceutical and chemical industries, as well as extreme hot or cold conditions. The stainless fittings come with FPM (Viton®) seals to guarantee the best performance at the highest temperatures.

“Quality Products at Competitive Prices” awaits you with ATP!

LIMITED WARRANTY

Advanced Technology Products expressly excludes all warranties, guarantees and representations, expressed or implied, including but not limited to warranties of merchantability, material, workmanship, design and suitability for a specified or intended purpose. Products shall be free from defects in material and workmanship for a period of one (1) year after shipment. If the product purchased is defective in any way during the one (1) year period, please contact ATP for an RGA number to return the product. No unauthorized returns will be accepted. Ship product prepaid to ATP for a full evaluation. If the product is found to be defective, ATP will repair or replace the product at no charge to the customer at ATP's sole discretion.

	G3/8	25N.m
	G1/2	40N.m

Danger

Do not use products in this catalog in machines that have the following purposes:

- Any medical, dental, or other application requiring FDA approval. Or Health Equipment.
- Transportation applications
- Instruments of critical safety

Warning

Do not use these products in the conditions below:

- Uses other than those specified and in conditions indicated for the particular product.
- Never touch the release sleeve of one-touch fittings when they are pressurized. (it may cause body disconnection, resulting in potentially dangerous situations)
- Places subject to excessive external pressure due to pulling, bending and twisting. (It may cause body breakdown, resulting in potentially dangerous situations).
- Places subject to excessive vibration, impact, rotation and bending.
- Places exposed to corrosive fluid, flammable fluid, chemicals, sea water, and/or sea water vapor.

Caution

- Assemble pipes only after cleaning away all impurities such as dust.
- The product can suffer damage or the screw may break causing quality problems when the product is assembled using excessive force, higher than the recommended tightening torque
- Refer to Recommended Torque Table by screw size when tightening.
- When connecting a tube to fitting products, be sure to push the tube until it bottoms out to the end of the fitting. Pull the tube back slightly to ensure the locking claw grips the tube.

Common Precaution on Fitting Products

Warning

- Do not use them on fluids other than air.
- Be sure to prevent pressure buildup caused by twisting, pulling, and bending of the fitting product.
- Do not use the product where weld spatters occur as fire may occur.
- Product damage or air leakage may occur at places where there is rotation and vibration. Choose the right product from our catalog.
- Use caution in water as the product may be damaged by surge pressure.
- Do not use the product where it is directly exposed to fluids such as cutting oil, lubricating oil, and coolant oil.

Caution

- Assemble the pipes only after cleaning away all impurities such as dust.
- Fitting products are used in connections to transport air smoothly. Avoid using them for other purposes.
- The tube release sleeve is circular so that it is not restricted by small places, otherwise, you may choose products from other series. (such as compact fittings).
- Refer to Table 1 to make sure that tolerance of the OD of the tube is in the permissible range when using products other than CDC Pneumatics.

Table 1: Tolerance of the Outer diameter of the Tube

● Tolerance of the OD by size (Inch)

Tube specifications	Ø1/8	Ø5/32	Ø3/16	Ø1/4	Ø5/16	Ø3/8	Ø1/2
Permissible tolerance	±0.15	±0.15 -0.1	±0.15	±0.1	+0.2 -0.15	±0.15	±0.15

● Tolerance of the OD by size (Metric)

Tube specifications	Ø3	Ø4	Ø6	Ø8	Ø10	Ø12	Ø16
Permissible tolerance	±0.1	±0.1	±0.1	±0.1	±0.15	±0.15	±0.15

Insertion of tube to fitting product

1. Make sure the tube is inserted fully to the end of the fitting until it bottoms out.
2. To insert the tube into the fitting, cut the tube at a right angle, insert to the end and pull the tube gently to make sure it isn't released.
3. If there is some damage or scratches on the oval shape and tube, air leakage and tube release may occur. Check the tube thoroughly.
4. The OD of polyurethane tube expands by pressure exerted on them. Reinsertion to the fitting may not be possible. Check the OD of the tube and change the tube if the expansion is serious.

Preparation	Tube cutting	Fitting connection	Tube insertion
 Prepare the tube, tube cutter, fitting connection devices (spanner or adjustable wrench).	 Cut the tube cleanly and to a perfect cross-section (90° angle).	 Tighten the connection with the spanner or adjustable wrench observing the recommended torque range on page 2.	 Mark the tube insertion length at the tube, and insert it in a straight line with the fitting. Make sure the marking is on the open cross section of the sleeve.

Nickel Plated Brass Fittings with Metal Release Ring

Part Numbering System

B 06-01ML-PT

Body Material
B=Brass

Tube
OD 1032 = 10-32 UNF
M5 = M5 x 0.8
01 = 1/8"
02 = 1/4"
03 = 3/8"
04 = 1/2"

Thread size

Model

NPT Thread = No Mark
BSPT(R) Thread = PT
BSPP(G) Thread = PP

Fractional tubing sizes are with NPT thread.
Metric tubing sizes are with BSPT(R) & BSPP(G) thread.

Material of Construction:

Available Sizes:

Fractional sizes available:
5/32", 3/16", 1/4", 5/16", 3/8", & 1/2" tube OD

Metric sizes available:
4mm, 6mm, 8mm, 10mm, 12mm, & 14mm

Recommended tolerance on tube $\pm 0.05\text{mm}$

316 Stainless Steel Fittings

Part Numbering System

SS14-01ML-PT

Body Material SS=Stainless Steel (316) Tube OD 1032 = 10-32 UNF Thread size M5 = M5 x 0.8 Model 01 = 1/8" 02 = 1/4" 03 = 3/8" 04 = 1/2" NPT Thread = No Mark BSPT(R) Thread = PT

Fractional tubing size are NPT thread.
Metric tubing size are BSPT(R) thread.

Available Sizes:

Fractional size available:

5/32", 3/16", 1/4", 5/16", 3/8", 1/2", & 5/8" tube OD

Metric size available:

4mm, 6mm, 8mm, 10mm, 12mm, 14mm, & 16mm tube OD

Material of Construction:

Note: 'O' ring EPDM are available on request. The stainless Steel 316 raw material meets the following specifications.

- a) SS-316 Bar Stock: ASTM A-479
- B) SS-316 Forging: ASTM A-182

Working pressure: 217 PSI

Constant pressure: Max pressure 217 PSI

Pulse pressure: Max pressure 145 PSI

Working temperature: -40°F to +302°F°

Vacuum rating: to 28" Hg

Application:

Food, chemical, pharmaceutical, oil & packaging industry.

Recommended Tubings: PTFE, PVDF

Acceptable tubing tolerances: +/- .003

Hardness Comparison

At ATP, we have developed the latest technology in tubing, spiral recoil & straight hoses, fittings and pneumatic accessories. In keeping with current market demands, our products offer ergonomics and safety advancements to help support assembly and automation applications.

Catalog # 08/2014

Armor-Weld™ Tubing

Polyurethane tubing covered with a flame-resistant layer. Meets UL94V0 rating. Designed for robotic welding and other severe-service applications. Can be bonded & spiraled.

Spiral Hoses

Technibond™, Technithane™ and our industry exclusives— the “Strong™” and “Strong-Plus™”. A tighter coil ID gives our Strong hoses better memory retention. The “Plus” is a lightweight, ergonomic, hose whip providing surface protection and operator comfort. Custom models are our specialty.

Technibond®

Thermally-bonded, polyurethane tube groupings available in straight and spiral configurations. Wire can be added to carry electric. Custom configurations welcome with no minimum quantities.

ARMOR-AIR™ Contractors Air Hose

Lightweight, flexible and much more abrasion-resistant than traditional rubber air hoses. A must-have for contractors, and anyone who owns an air compressor. Available with varying hardness and many colors. Reinforced with nylon for greater working pressures. Standard & custom assemblies and spirals.

Free Angle® Swivel Fitting.

The rubber boot has been replaced by an exclusive steel cover giving it a much longer service life. Our two rotation points make this superior to the imitators. The ergonomic, patented 360° circular rotation and 45° angled rotation makes this fitting indispensable for air tool and assembly applications.

Hose & Cable Balancers

Durable cases and high-quality internal components make up our balancers. Ideal for workstation ergonomics.

Oetiker® Clamps

The Oetiker® Clamp creates a spring effect when the hose material expands or contracts in response to thermal or mechanical influences such as temperature, vibration, etc. Single ear, double ear and stepless in both carbon steel and stainless steel.

Tubing - Polyurethane, Polyethylene, Nylon, PTFE, PVC

Only the highest-quality materials go into manufacturing our tubing. Over 50 stock sizes and 12 stock colors in both fractional and metric dimensions. Different Compounds and hardness are available upon request.

Quick Disconnect Couplings

Available in low pressure, steel, brass and stainless for pneumatic applications. Several models of safety couplings are also available from stock.

Blow Guns

ATP offers a wide variety of blow guns ranging from an economical safety blow gun to rugged high end ultra quiet blow guns, all available with various interchangeable nozzles.
